

## **APPEAL**

The information about National Innovation Foundation-India(Department of Science & Technology, GOI) as well as some useful grassroots innovations is hereby kept in public domain. These Innovations are developed by common people having first-hand experience of all the issues involved and thus are need-based, cost-effective and sustainable.

For more details of National level innovations, NIF, please click the following link.

### **NATIONAL INNOVATION FOUNDATION – INDIA.**

If there are unaided technological innovations or traditional knowledge developed at grassroots by an individual or group comprising farmers, artisans, women, slum dwellers, workshop mechanics, students, local communities in the district, they can contact District Innovation Committee under the Chairmanship of Hon'ble District Collector. They can submit the innovation details to Dist.Innovation Committee. The innovations can be in agriculture, machines, processes or products for farm/non-farm operations, household utility, transportation, energy conservation or generation, reduction in drudgery, development of plant varieties, development of herbal remedies for human/animal problems or any other low cost sustainable green technologies. These innovations should be unaided/unsupervised and an outcome of one's own creativity, without any technical support from external agencies. District Innovation Committee will get in touch with innovator and take the work forward if it is innovative and sustainable.

District Collector & Chairman  
District Innovation Committee Solapur.
